

Aqib Hafeez

DevOps/DevSecOps Engineer

Islamabad, Pakistan | +923499476288

aqibhafeez422@gmail.com | linkedin.com/in/aqib-hafeez | [Github](#)

OBJECTIVE

DevOps Engineer with strong hands-on experience in CI/CD pipelines, Github Action, Linux, Docker, Kubernetes, cloud infrastructure, AWS, Azure DevOps and Infrastructure as Code (IaC). Seeking a DevOps role to automate deployments, optimize cloud systems, and ensure reliable, scalable infrastructure.

EXPERIENCE

Junior DevOps Engineer

January 2025 – Present

Quidditty

Islamabad, Pakistan

- Built and deployed AWS infrastructure using Terraform (VPC, EC2, EKS, MSK, ALB, Route53).
- Configured Terraform remote backend with S3 state management and versioning.
- Developed CI/CD pipelines using GitHub Actions, Docker, and HashiCorp Vault for secrets.
- Containerized applications with Docker and configured NGINX for load balancing.
- Implemented monitoring with Prometheus, Loki, and Grafana dashboards.
- Managed DNS (BIND), firewall rules, and security policies for production workloads.

Junior DevOps Engineer

January 2024 – December 2024

Software Development Hub

Remote/Hybrid

- Deployed PHP applications on Apache servers and managed AWS infrastructure including EC2 instances and ALBs.
- Implemented CI/CD pipelines for automation and deployment processes.
- Deployed real-world DevOps pipelines and automation workflows with the team.

PROJECTS

AWS Infra Automation with Terraform | *Terraform, AWS VPC, EC2, EKS, RDS*

- Automated the provisioning of VPC, EC2, ALB, RDS, MSK, EKS, and security policies.

CI/CD Pipeline for Node.js App | *GitHub Actions, Docker, Node.js*

- Implemented automated testing and deployment workflows using Docker Compose and GitHub Actions.

CI/CD Pipeline for .NET App | *GitHub Actions, Docker, Azure App service*

Dockerized Django Application | *Docker, Python, Nginx, AWS*

- Deployed a containerized Django app with an Nginx reverse proxy on AWS EC2.

Kubernetes Cluster Setup | *Kubeadm, Nginx Ingress*

- Set up a cluster using kubeadm with Nginx Ingress controller and configured autoscaling.

TECHNICAL SKILLS

Infrastructure as Code: Terraform, Ansible (basic familiarity)

Containers: Docker, Kubernetes

CI/CD Tools: GitHub Actions, Azure CICD, Jenkins

DevSecOps & Security: SonarQube (SAST), Lynis (Host Hardening System Audit) Nikto (Web Server Security Assessment), IAM, CloudTrail, GitLeaks (Secrets Detection), Trivy (Container Scanning), HashiCorp Vault (Secrets Management)

AWS Cloud: EC2, S3, Lambda, SQS, IAM, VPC, EIP, ALB, , ECS, RDS, MSK(Kafka), Route53, ACM, Secrets Manager

Azure Cloud: VMs, Blob Storage, VNet, Container Instances, SQL DB, Key Vault

Monitoring & Logging: Prometheus, Grafana, Loki, ELK Stack (basic familiarity)

Networking: DNS, Firewalls, Load Balancing, TCP/IP

Scripting: Bash (basic familiarity)

Version Control: Git, GitHub

EDUCATION

Abasyn University

Bachelor of Science in Computer Science

Islamabad

Jan 2021 – Dec 2024

COURSES & CERTIFICATIONS

Certified Kubernetes Administrator (CKA) – KodeKloud

Terraform Associate – KodeKloud

AWS Certified Solutions Architect – Associate – Udemy

AWS Cloud Practitioner – AWS

GitHub Actions Certification – KodeKloud

Loki & Grafana Monitoring – KodeKloud

Docker – KodeKloud

Mastering Linux – Udemy
